

Perforation Tester

Model No. PST - 2001

Perforation Tester is a consistent tool to quantify the perforation strength or tensile ability of perforated materials like pouches, thermoplastic films, paper & packaging. They are used after separation of two consecutive sheets. It is important to know the efficiency of the pre-cut perforations. The perforation strength should be enough to ensure the product cohesion in order to separate the samples easily.

- Microprocessor based display for accurate test results
- Works on Constant Rate of Elongation (CRE) Principle
- Display for Perforation strength of test specimen
- Highly accurate test results under Tensile force
- Strong gripping clamps to perform test at 180 degree.
- Bright LED display
- Inbuilt calibration facility
- Feather touch controls

Perforation Tester reveals the perforation strength force required to remove perforations, which has been applied to standard test specimen under specified conditions at a specified angle.

Key Specifications:

Load Cell Capacity	50 Kgf
Display	LED (Digital) 7 segment
Accuracy	± 2% at full load (with master load)
Least Count/Resolution	10 gm
Power	220V AC , 5 Amp., Single phase, 50 Hz
Test Speed	300 mm/min ± 5%
Memory	After perform the test max. value save in memory
Test Sample Grip Size	140 mm ± 5 mm (width)

Highlights:

Safety Switch	Yes
Material	Mild Steel
Finish	Powder coated Havel Gray & Blue combination finish and bright chrome / zinc plating for corrosion resistant finish
Dimensions	600x500x120 mm

Optional :

1. Computerised model also available
2. Variable speed control drive for testing at different speed 30 - 300 mm / min or 50 - 500 mm / min.

Accessories Including :

- Perforation test non slip grippers - 1 set.
